

Client: Coleman Rail - Adelaide

Adelaide Tram Extension Walkway:

Adshel Infrastructure worked in partnership with the South Australian Government and their design team to deliver five, 20 metre walkway shelters along the new tram extension in William Street, Adelaide. The Walkway's central beam acts as a visual anchor for the cantilevered roof struts as well as housing solar powered lighting and signage, all of which serve to provide a comfortable environment for users. The Walkway shelters have been developed to reflect Adelaide's commitment to environmental sustainability and its recent designation as a 'Solar City' with the roof structure created with modular solar panels integrated into the glass panel. In June 2008, this project was awarded the 2008 Adelaide Prize presented by the Lord Mayor.
